

## Cloud Based Managed Testing Services

### Client Overview

A leading European financial services provider that offers a broad range of products and services to individuals, businesses and institutions

### Business Challenges

The client had two TEMENOS T24™ Implementations in two separate geographies in 2009 and were in process of implementing T24 in a third location. The client was looking for a complete roadmap to testing managed services with improved processes, methodologies, status reporting and enhanced project team collaboration.

### Solution Outline

- Scoping & Gap Analysis
- On boarding and setting up of Cloud Based Managed Testing Services
- Optimization & Design of Test Cases
- Mapping of Test Cases with Test Data
- Execution of Test Cases
- Production of all the management reporting for project progress and defect and change management

### Benefits & Advantages

- ✓ Measurement of testing activities with the help of defined metrics and reports
- ✓ Clear analysis of requirement coverage, execution status, defect status and other management reports
- ✓ Effective Utilization of time and resources to reduce the turn-around time
- ✓ Hybrid approach and functional testing approach to identify defects at early stages and reduce the test cycle time
- ✓ T24 functional experts to optimize and create test cases
- ✓ Availability of reusable set of test cases from Validata Test Factory™

### Technology

**Application**  
T24

**Technology**  
Validata

**Platform**  
UNIX/Windows
