

Nordea Bank selects Validata Test Factory™ model for end-to-end testing and configuration management

Client Overview

Nordea  A leading and one of the largest European Financial services provider operating in more than 9 countries that offers a broad range of products and services and splits its operations into three main divisions: Nordic banking, private banking, institutional and international banking. It operates through a network of about 1,400 branches and serves some 10 million customers, including about 700,000 corporate clients. About 60% of its lending activity is to corporations. Its Internet bank claims nearly 6 million users.

Business Challenge

With two T24 implementations in two different geographical locations in 2009 and a third one going on on a third location, the client was looking for a complete road map to managed testing services with improved processes, methodologies, status reporting and enhanced project team collaboration.

- T24 upgrade in Estonia
- Euro Conversion for Estonia
- Upgrade for Latvia & Lithuania

Solution Outline

- | | |
|--|---|
| <ul style="list-style-type: none"> • Scoping and Gap Analysis • On boarding and setting up of Managed Test Services at Validata Host • Build and Deployment Management across multiple T24 environments • T24 Environments Management and Comparison Reporting | <ul style="list-style-type: none"> • Design & Optimization of the Test Cases in Validata ATS • Execution of the Test Cases through Validata ATS in the related T24 Environments • Operation of the Managed Test Services |
|--|---|

Benefits & Advantages
